New faculty profiles

Communication Arts'
newest member

By JOSEPH F. PIRRO

His office at the Ritter Center begins to take shape, with the third week of classes. J.K. Miller is an educator who brings a wealth of knowledge and experience to the Ursinus community this year. He responded to an advertisement placed by Dr. Joyce Henry, head of the Communication Arts department, in the Chronicle of Higher Education back in March. Dr. Miller has arrived and will teach courses in mass media and society, advanced television production, and two sections of public speaking. He also plans to be the faculty adviser for the Ursinus radio station WVOU. He has had training and experience in such areas as video production and skills, television, radio, photography, broadcast newswriting, educational media, and theory of mass communication industry.

Dr. Miller's educational background began at Rutgers University where he graduated in 1967 with a BA in Political Science. He then went to Miami University in Oxford, Ohio to obtain a masters in Political Science. From Union Graduate School at Antioch University he received a Ph.D. in Mass Communications. He has also earned a MCPR degree from Rutgers, which is a professional degree in the planning of telecommunications.

As J.K. Miller enters Ursinus College, he brings about 11 years of teaching experience with him

in the communication field. From 1971 to 1973, he taught at Rutgers in their Urban Studies Division. In this program, Miller was an assistant in mass communications courses.

In speaking with him last week he expressed that he became interested in Ursinus College because of the small school environment, and its emphasis on the student which Miller believes to be essential in a college career. This is achieved from the person to person contact. Thus far, he is happy with Ursinus because of its friendliness. Dr. Miller also likes being able to go across campus and cross paths with one his students.

He says that students in his two speech sections have been "a bit nervous." But Miller mentioned that he is very impressed by the fact that all of the students are eager to talk about any problems they are having. Within the Communication Arts Department, he hopes more courses will soon be added, and that the newly installed course in mass media and society will continue to draw more students.

The students themselves seem to be very impressed with the new professor. A senior in one of Miller's public speaking courses said that, "He is very personal and has a good delivery." As we have seen, Dr. Miller brings an education filled background; one that can only help our college. The Ursinus community welcomes J.K. Miller.

J.K. Miller.

Limerick: Nuclear power
comes to Montgomery County

By TOM FEENEY

(Part 1 of a 3 part series)

According to the Energy Research and Development Administration (ERDA), there are now more than 230 nuclear power plants in various stages of operation, construction, and planning. Although more than 60 of these plants now operate commercially, a large percentage of the remaining 170 plants continue to exist only as blueprints; the construction of these plants has been stalled or stopped by technical inadequacies and political controversies.

Despite the claims of groups such as Edison Electric Institute (EEI) that an overwhelming majority of Americans favor the completion and subsequent full-scale commercial operation of these plants, opposition groups are vocal and vehement. Although specific concerns differ from group to group, most believe that the possible ill effects of radioactivity are sufficient cause to abandon the development of nuclear technologies and the construction of nuclear power plants.

Opposition groups have not been able to dissuade those who believe nuclear energy is the energy source of the future, but they have stalled the construction of many facilities.

Advocates of nuclear power, especially the large utilities, assert that their opponents have

caused the United States to lag far behind other countries in nuclear technologies. And the fears of those who oppose nuclear power, proponents believe, are unfounded. These apprehensions are caused by a lack of information or misinformation, they say. If we are unable to put these fears to rest, proponents of nuclear energy believe we will lose political leverage with smaller but more technologically advanced nations.

commercial use" will perhaps be seen as one of the major questions of this century. And as such, it is imperative that each of us find a satisfactory answer by drawing conclusions from information grounded in fact, not myth.

THE QUESTION AT URSINUS

In Limerick, just a few miles west of Collegeville, Philadelphia Electric Company (PEC) plans to begin commercial operation of

(Anti-Nuclear Groups)

Most groups believe that the possible ill effect of radioactivity are sufficient cause to abandon the construction of nuclear power plants.

The Committee for Energy Awareness (CEA) blames the press for a great deal of misinformation, claiming that "scare statements" tend to grab headlines, exacerbating and perpetuating the public's unfounded apprehensions. EEI maintains that "imaginative works of fiction," such as "China Syndrome," have created irrational fears in the minds of uninformed Americans.

Pro-nuclear and anti-nuclear groups have been squared off for more than a decade now and it is likely that they will be in opposition for many years to come. The seemingly simple question "Should America put nuclear power technologies in com-

mercial use" will perhaps be seen as one of the major questions of this century. And as such, it is imperative that each of us find a satisfactory answer by drawing conclusions from information grounded in fact, not myth.

Because of the proximity of this facility, the nuclear controversy takes on an added dimension for Ursinus College students. Regardless of the result, the decision will affect us all.

Naturally, then, it will benefit all of us if we can sidestep the enormous amounts of propaganda spawned by both proponents and opponents of nuclear power, and examine the issue open-mindedly.

This article and the remainder of the articles in this series will provide information about nuclear technology in general, and about the Limerick Nuclear

The Grizzly was founded in 1978, replacing the previous campus newspaper, The Ursinus Weekly. It is published by students ten weeks each semester. The Grizzly is edited entirely by students and the views expressed in the paper are not necessarily those held by the administration, faculty, or a consensus of the student body. The staff of The Grizzly invites opinions from the college community and will publish them as time and space permit.

News of Yesteryear

By AMY KISTLER

More Unsus students are aware of the campus rumors concerning stories of ghosts in Shreiner Hall, but they do not know the exact origin of these rumors. The following article is taken from "The Ursinus Weekly" dated Thursday, Oct. 24, 1974. This article, written ten years ago, explains the basis for such ghost stories and discounts their authenticity.

IS THERE A GHOST IN U.C.'S HAUNTED HALL?

"Sidney Houck and Rita DeMassa are level-headed young women in their senior year at Ursinus College, Collegeville.

"But they are convinced — and they are dead serious — that a ghost inhabits their room on the third floor of an old Victorian house."

These three paragraphs introduced a lengthy, mind-stirring article entitled "Ghost Stalks Ursinus College" in the October 4 issue of "The Mercury," a daily Pottstown newspaper. Mercury staff writer Thomas Hylton investigated seemingly every angle associated with the ghost stories alive on campus, and delivered a detailed report on the ghostly happenings, complete with infrared exposures revealing the figure of the mysterious poltergeist.

Shreiner Hall, at 602 Main St., directly across from the main gate of Ursinus College, is the building of reference — an old dormitory housing 22 women. Originally the home of Dr. J.A.H. Bomberger, the ownership of the house changed hands several times before the college bought it and converted it into a women's dorm. Recently, stories of ghosts have been connected to the old building — stories of a tragic love affair between a young man and

and a woman who once lived in the house which is now Shreiner. As legend has it, the boy lived next door in the building presently Hobson Hall. Though the two were in love, their families forbade their marriage, so the young man left Collegeville and joined the Navy. While at sea, he was killed; when the girl learned of his death, she committed suicide. It is her ghost, supposedly, that haunts Room 15 of Shreiner Hall.

Sid Houck and Rita DeMassa are the inhabitants of that room. The girls' accounts of mirrors falling off the wall with their nails landing at the foot of their beds, and footsteps heard in early morning hours are well known and believed by most of the girls at Shreiner. Mrs. Perkins, who became housemother of the Hall on October 1 of this year, states that there have been no suspicious occurrences or ghost-like happenings on the first floor, nor have Sid and Rita notified her of their experiences. When asked whether she felt the events to be the valid work of a ghost, she replied, "I don't believe that any such thing as a ghost exists. It's all a big joke." In response to the Mercury article, Mrs. Perkins claimed, "There are always stories connected to any big house with lots of stairs and closets. The picture in the paper was trick photography." Sid Houck agrees somewhat with Mrs. Perkins view on the newspaper story, "It's all weird," she replied. "The Mercury really played it up."

Undoubtedly, the controversy over whether or not a ghost exists in Shreiner Hall will continue until everyone can see for himself what Sid and Rita have experienced. The dorm is still there, so is Room 15...

College programs may face budget cuts

WASHINGTON, D.C. — College programs may be more vulnerable than ever to budget cuts in the next year because several key congressmen will be missing from House education committees, sources say.

The missing congressmen all played important roles in staving off many of President Reagan's proposed student aid cuts in the

last three years.

They are leaving their committees, moreover, as Congress considers the Higher Education Reauthorization Act of 1985, a crucially-important law that will set federal college policy for the rest of this decade.

Missing will be Rep. Carl Perkins (D-Ky), chairman of the House Education-Labor Com-

mittee, who died this summer, and Rep. Paul Simon (D-Ill), chair of the House Subcommittee on Postsecondary Education, who is running for the Senate against Charles Percy.

Two other House education committee members are retiring this year.

"Perkins was probably the person most responsible for holding the line against budget cuts Reagan has proposed since 1980," says Dallas Martin, head of the National Association of Student Financial Aid Administrators.

"It was clearly his strong leadership on that committee that refused to go along with some of the (cuts). It will take another individual a long, long time to live up to Carl Perkins' standards," Martins says.

Simon, as subcommittee chairman, opposed making students pass a "needs test" to get loans, and helped mobilize the impressive nationwide lobbying efforts that turned the tide against the student aid cuts in 1982.

The education committees are also losing representative Ray Kogovsek (D-Co) and Frank Harrison (D-Pa). Kogovsek is retiring, and Harrison lost a primary race earlier this year.

While the departures are "not going to be positive, there will be no less commitment on the parts of the remaining members," counsels William Blakey, the subcommittee's staff director.

Commitment or not, some congressional sources say the losses will make education a relatively easy target for budget cuts next January when the new Congress tries to slash the \$175 billion federal deficit.

"Higher education programs (See CUTS, P7)

Students nix pass/fail system

Pass/fail grading systems have failed, and students who have a chance to use them generally reject them, according to a survey of over 1600 colleges using the pass/fail system.

Dr. C. James Quann, registrar at Washington State University and author of the survey, says students do worse when they're given pass/fail grades instead of letter grades.

"Many institutions are beginning to realize students perform on a lower level with pass/fail systems," he says. "Students come to class late, skip classes, don't do assignments and hold other students back. Performance is below par in many cases."

Quann sees the system as a vestige of the more experimental sixties and early seventies.

Even so, "only a small percentage of schools that initiated pass/fail options abandoned them altogether on the theory that if you give the students something, it hurts to take it away," Quann adds.

Northwest Missouri State University, for example, changed its pass/fail system in 1979, letting students use it in a maximum of nine credit hours.

"It's not overused anymore,"

reports Registrar Linda Girard. "People were taking advantage of it: using for hard major classes and GED requirements. Faculty is much happier now."

Quann's own Washington State still offers pass/fail options, but only seven percent of the student body uses it.

Some schools, of course, remain devotees of the system.

"Faculty instituted this system to encourage learning for the sake of learning, instead of a competitive environment," reports Nancy Pascal, associate registrar at the University of California-Santa Cruz.

"Students like this environment and the freedom to test things more than under a traditional system," she claims. "Faculty is committed (to it) despite the enormous task of written evaluations."

Quann believes more schools are moving away from pass/fail systems, however, if only because grading fashions change from time to time.

Pass/fail systems were common in the 19th century, until they were supplanted by numerical grading practices, he explains. Symbols and letters later appeared to summarize numerical groupings.

NATIONAL CAMPUS SHORTS

NORTHWESTERN COLLEGE PRESIDENT NIXES ART SHOW AS PORNOGRAPHIC

Friedhelm Radandt, president of the Orange City, Ia., campus, said one painting among a 36-piece show was "unacceptable," prompting artist Bob Plageman to remove all his pieces from the show.

The show's theme was "East Meets West," with Plageman's Indian art comprising the western part and Takeski Hayakawa's paintings the eastern part.

Radandt objected to a Plageman painting of a nude woman wearing a mask.

STUDENT GETS TUITION REFUND OF \$6,210

Myrna Baxter got her refund after Brown Mackie College in

Salina, Ks., promised its students repayment if they didn't get a job within 120 days of graduation.

Baxter got a job 150 days after graduation.

It's the first refund the school's made since adopting the policy last fall.

NOTES FROM ALL OVER: St. Peter's College has dropped its football program after losing a game 72-0 and having a fifth of its players injured in the process...Chattanooga Tech has a new course to help people lose their southern accents.

LETTER POLICY

Letters must be typed and no more than 300 words. Name and telephone number are required for verification purposes. Letters should be deposited in the Grizzly mail box in Corson Basement by 7 p.m. Monday. The Grizzly reserves the right to edit all letters. Requests for anonymity will be considered by the editorial board.

Nuclear power in Montgomery County

(Continued from Page 1)

Generating Plant in specific, that will help those who are interested in examining the controversy and reaching their own conclusions.

NUCLEAR FISSION FOR THE LAYMAN

An understanding of the process by which nuclear power plants change matter into energy is essential to an understanding of the controversy that it has caused.

Forty years ago, when scientists first split the atom, nuclear generation became a reality. The atom is the basic unit of nuclear power.

There are three components of every atom: protons, neutrons, and electrons. The number of

components of a commercial reactor. The first is the core, which houses the fuel assemblies (metal tubes containing pellets of U-238 and U-235). The second is the control rods, which control the rate of fission. And the third is the water cooling system. In this system, the heat created by the splitting of the atoms boils water to make steam. The steam then spins the turbine generator, thus producing electricity. After the steam passes through the turbine, it is condensed back into water and pumped back to the boiler to begin the process again.

SOME LIMERICK SPECIFICS

The Limerick Generating station will have two boiling

PECO claims that "by the fall of 1988...the Limerick plant will be capable of generating 2,110,000 kilowatts of electric power and will save...24 million barrels of oil each year."

protons in an atom's nucleus determines what chemical element it is; this is the atom's atomic number. Atomic weight is determined by the number of protons and neutrons in the nucleus. Atoms of the same chemical element can have different atomic weights because the number of neutrons in the nucleus can vary; these atoms are called isotopes.

The uranium isotope U-235 is the fuel used in nuclear reactors.

The nuclear fission process occurs when the nucleus of an atom of U-235 is struck by a free neutron. The neutron breaks the atom into two or more elements and energy is released in the forms of heat and radiation. The weight of the fission products does not equal the weight of the U-235 atom that was split. The amount of missing matter has become heat energy.

Inside a nuclear reactor, the fission process takes place. Neutrons released during this process contact other U-235 atoms in the reactor core. These atoms then fission, thus sustaining the fission process by chain reaction. The greater the number of atoms split, the greater the amount of heat produced.

The number of atoms split, the chain reaction is controlled by rods inserted into or withdrawn from the core. Those control rods act like sponges when they are inserted into the core. They absorb neutrons, preventing them from splitting more atoms, thus slowing the fission process and reducing the amount of heat generated when the rods are withdrawn, the fission rate is increased.

There are three essential

water reactors (BWR). PECO's Salem Generating station in Salem County, N.J., operates a pressurized water reactor (PWR). In the PWR, water in the reactor is kept under enough pressure to prevent it from boiling. The pressurized water is passed through a steam generator outside the reactor vessel where it is permitted to boil; the consequent steam is then fed into the turbine to spin the generator. In the BWR at Limerick, steam is formed in the reactor vessel itself and sent directly to the turbine. Limerick's choice of the BWR has proved to be a costly one. Inspectors discovered certain structural weaknesses in these reactors. It has cost PECO several million dollars to emend these problems.

The cooling towers of Limerick, the two enormous cement structures visible to passersby for miles around, condense the steam back into water, passing the heat into the atmosphere. This method of cooling is referred to as the hyperbolic natural draft tower method.

By the fall of 1988, when PECO plans to have both units on line, the Limerick plant will be capable of generating 2,110,000 kilowatts of electric power. The operation, PECO claims, will save the equivalent of 24 million barrels of oil each year.

PECO's Peach Bottom plant, near York, PA, claims to have saved customers nearly 850 million dollars since it began commercial operation in 1974. The company claims that similar savings will be had when the Limerick plant is in full operation.

GRIZZLY BEAR SPORTS

September 28, 1984

The Grizzly 5

Carrie Rainey, junior, chases a Delaware player during last week's 3-1 Ursinus victory. Ursinus is ranked 12th in the nation in the first Division I standings released this season.

Soccer rebounds from loss to Drexel

By KENNY BULL

Last Tuesday Ursinus College went into Philadelphia very confident. They were psyched to defeat Drexel University. However, Ursinus faced it's toughest opponent of the year. Drexel from the beginning of the game dominated the Red and Gold and continued to do so throughout the game.

Drexel was able to move the ball all over the field without much pressure from U.C. The final score was 6-0 and Ursinus confidence was somewhat injured. Although Drexel had played a miraculous game the Bears weren't hustling to the ball or running to the right spots of the field. Anthony Bono of Drexel had a hat trick to lead the team in goals. Sounds impressive!

However, two of his goals were assisted by Ursinus players: Ursinus took this game as a lesson. Practice the next afternoon was intense and Ursinus was realizing that they still are a good team. They just have to work harder. On Saturday, Sept. 22, they did just that. A tough Drew University squad came to visit U.C. However, it was a unpleasant one for the Rangers.

Ursinus defeated them, 2-1. It was obvious that Ursinus was the better team from the beginning but they had trouble scoring. Drew applied pressure but the Ursinus defense lead by goalie Jim Barnes (the core of the team) held them tight. Midway through the first half Ursinus was

he noticed Drew trying to hold U.C. so they would be offside. Seeing this Moyer pushed a through ball to John Ackerman. As soon as the ball touched John's foot the U.C. band went crazy. Yes it was a goal. The first half ended like this 1-0, Ursinus.

The second half was a little tougher. Drew scored early in the second half to tie the score, 1-1. This game began to get rough in the second half. After some confusion in front of the Drew net a Drew player began swinging at Jamie Moyer, suddenly the U.C. players came to Jamie's side. No fights occurred except frustration. About two minutes after this fight the ball again was bouncing around inside the 18 yard line. And Ursinus capitalized. The ball bounced in front of Kenny Bull and he cracked a shot in the back of the net. This is all Ursinus needed to defeat Drew although they should of had a couple more goals. This ups their record to 4-1.

on the attack. Jamie Moyer was rushing up the middle, suddenly

Next Games: Scranton away, Wednesday, 4 p.m.; John Hopkins away Friday, 7 p.m.

Hockey player named to US squad

By KATIE CYR

Marsha Herb, senior co-captain of Ursinus Field Hockey Team has recently been selected as a member of the United States Field Hockey Squad. To attain this position she had to attend training camps for the first three weeks in July.

The petite 5'1" athlete plays the position of midfield attack player. Marsha began the program by attending LaSalle College at the designated "C" level camp. The camp lasted from July 14 and then select players, including Marsha were invited to attend the next level.

"B" camp was located at Smith College in Massachusetts and began on July 6 and ended on July 10. Once again Marsha had a fine performance and progressed to the highest level.

On July 12, Marsha ventured out to Colorado Springs, Colorado to attend "A" camp. The US squad of 90 girls practiced and played at the Olympic Training Center. On July 22 the squad divided up into six teams and competed in the Pike's Peak Tournament.

To make it to this final level, Marsha had to be a dedicated and devoted player. The competition in the camps was stiff and fierce. The camps had to be paid by the individual participants until they reached level "A" camp. This

shows the strong commitment Marsha has towards the sport of field hockey.

Prior to attending this three-level camp Marsh spent three weeks with the Ursinus Field Hockey team touring Holland and competing with other club teams from Holland and other European countries.

Marsha is now in her fourth and final year of playing field hockey at Ursinus, when asked about her chances of becoming a member of the 1988 United States Field Hockey squad, Marsha stated that in order to make the United States Field Hockey team, she would have to continue attending the camps each year. The only difference would be that she would begin at the "B" level camp instead of the "C" level. She would have to continue this until 1988.

Marsha is currently committed to leading the Ursinus Field Hockey team to an undefeated season. Her commitments lie elsewhere too. For example, she has recently been chosen to the Dean's Honor List. Refereeing is another one of Marsha's specialties. She stated that "it's a challenge to referee field hockey, but in a way it's helpful because I get to see the game from the observer's point of view and that helps me improve my own skills."

X-Country competes in invitational

By DOUG NEVINS

The Ursinus cross country team ventured out towards Pittsburgh over the weekend to compete in the prestigious Indiana Invitational. Despite being the smallest school in the race, the Bears placed 8th out of a field of 17 predominantly Division I and II universities.

Al Fertig and Doug Nevins led the squad as they ran their way to top 25 finishes in the 10,000 meter race. With Mike Griffin also placing high and John Gelhard, Tom Kerschner and Keith Kerr rounding out the scoring, the Grizzlies proved they could compete with the larger schools.

Two big reasons why the Bears are running well this season are a healthy Fertig and Griffin. Each has been plagued by injuries throughout his career, but this

year they are both running injury-free and are making their presence felt. Fertig has already taken a second place in the Philly Metro meet, while Griffin has also been a front runner in every race. Combining these two with Nevins, Gelhard, and Kerschner gives the Bearpack a top five that can run with any other team in the conference.

Commenting on his team's early season performance, Coach Dave Symonds noted, "Overall I'm pleased with our races thus far. We've held our own against some top quality teams and that should prepare us for our upcoming conference meets."

The Bearpack has this week off, but next Saturday they go into action against Johns Hopkins and Lebanon Valley in their first MAC meet of the year.

The Grizzlies prepare to meet Western Maryland before Saturday's disappointing, but close, loss.

Grizzlies lose to W. Maryland

By TIM COSGRAVE

A capacity Parents Day crowd of nearly 6500 saw a charged up Western Maryland squad rebound from a 14-7 halftime deficit to defeat the Grizzlies, 20-14.

The Grizzlies started the scoring first when Brian McCloskey hit tailback Joe Sawyers for a 5 yard TD. The drive was highlighted by the running of Sawyers and Quarterback Brian McCloskey. Center Steve Sullivan helped spring a 20-yard run with a crunching blow to the Western Maryland cornerback.

The Grizzlies struck again when defensive end Mike "Popeye" Pascali intercepted a Ray Evans screen pass and rambed 35 yards for the touchdown. John Carey converted and the Grizzlies looked to be in total command with a 14-0 lead.

The Grizzlies threatened to score again when with two minutes left in the half they had the ball on Western Maryland's 10 yard line. A deflected McCloskey pass was intercepted by

Maryland's Joe Callahan and he raced 97 yards for the TD.

This seemed to take the air out of the Grizzlies as Western Maryland tied the game when Quarterback Evans scrambled 10 yards for the touchdown.

Western Maryland put the game out of reach when Keith Highsmith intercepted a pass and rambed 90 yards for a touchdown.

It was quite a disappointing loss Saturday as the Grizzlies dropped to 0-2. Defensively the Grizzlies played tough as they only gave up 7 points and three first downs. Offensively the Grizzlies moved the ball well but unfortunate turnovers cost them the game.

BEAR BITS: The Grizzlies travel to Swarthmore Saturday...Center Steve Sullivan is questionable Saturday with a groin pull...Tailback Mark Garcia has been lost for the season with torn ligaments in his knee...The JV's lost their opener Monday to Gettysburg 9-7, punt returner John "M.J." Schmitt scored on a 45 yard punt return.

By CHRIS GODOR

The fourth week of the NFL is over with few surprises. In the NFC East, the Dallas Cowboys and New York Giants are tied for first place. The Cowboys are on the top every year, but they have some unexpected company in the Giants. Both teams are 3-1. The Cowboys are not the same team as they were a year ago; 13 players from the previous season are no longer Cowboys for reasons of retirement or trades. The receiving crops is very decimated with the loss of Drew Pearson, Butch Johnson, Billy Joe DuPree, and Tony Hill. They have acquired several new receivers such as Harold Carmichael and Mike Renfro.

The defense is still shaky in the secondary and linebackers. The front four of Dallas has to be one of the best in the league. Randy White, John Dutton and Ed "Too Tall" Jones are back, and Jim Jeffcoat is doing a good job of filling Harvey Martin's shoes. The defense allowed Green Bay only 207 total yards last week. Also, the Packers quarterbacks were thrown on the carpet six times, and they threw four interceptions.

The Giants are a team that has threatened to be a contender, but each year, they seemed to fall to their knees at the end of the season.

Phil Simms is throwing passes like never before. Their new deep attack consists of Bobby Jackson and Zeke Mowatt. Rob Carpenter and Butch Woolfolk are the primary running backs. Since coming over from the Houston Oilers, Carpenter has racked up the yardage. In Houston, he was in the shadow of Earl Campbell. New York has allowed Carpenter

to develop into the tough, hard-hitting back that he is.

The Giants have one of the best groups of linebackers in the NFL. Beginning with the outside backer, Lawrence Taylor, who is capable of running down most quarterbacks and running backs from his position. He is permitted by the coaches to use his own judgement as when he will rush the passer. Just last week against Tampa Bay, he had four of the Giants five sacks of Scott DeBerg.

The Washington Redskins, at 2-2, are in third place. They rolled over the New England Patriots last week with a score of 26-10. John Riggins had another fine day of running, carrying the ball 33 times for 140 yards. Overall the Redskins rushed for 235 yards against a fairly strong rushing defense. Theismann was effectively controlled in the passing department; he tossed the ball for only 97 total yards.

The Redskins defense was not allowing the Pats to run with the ball; New England achieved a measly 17 net yards rushing. However, the secondary gave up more than 230 yards. New England had their quarterback taken down four times; therefore, the front line of Washington is still a group to be reckoned with.

St. Louis is right along side the Skins with a record of 2-2. Neil Lomax is their gun in the backfield. In his last game, he completed 24 passes for almost 270 yards. Stump Mitchell and Ottis Anderson are the main runners in the Cardinal offense. Lomax still has Tilley, Mitchell, and Green to go long.

Now the Eagles; there is not a lot of things to say about this

team. Ron Jaworski is the QB. Most of the rushing will be done by Wilbert Montgomery. The receivers are Kenny Jackson, Mike Quick, and John Spagnola at tight end. The defense is nothing like the swarming defense of a few years ago. The Eagles are in the basement at 1-3, and they appear to be remaining down there for the season.

Around the league: In the Central Division of the NFC, the Chicago Bears are a surprise leader at 3-1 with their last game being their first loss. Minnesota is trailing them at 2-2. On the West Coast, San Francisco is one of three teams remaining undefeated. The other teams in their group, Atlanta, New Orleans and L.A. Rams, are all 2-2.

To the AFC East, Miami is 4-0, while the N.Y. Jets are close behind at 3-1. The Central Division is a mess. No one really wants to win. Pittsburgh is on top with a 2-2 record. Cleveland is next at 1-3 with their first win last week against Pittsburgh. Both Cincinnati and the Oilers are floundering in the cellar with 0-4 records. The Raiders kept their undefeated record with a come-from-behind win against the San Diego Chargers on Monday night. The Seahawks and the Broncos are tied for second; both have one loss. At 2-2 are San Diego and Kansas City, who have had two tough losses in their last two games.

The games to watch out for this weekend are Dallas against Chicago, Atlanta at San Francisco, the Raiders vs. the Broncos, and Seattle taking on the Vikings.

Thank You

The staff of The Grizzly would like to thank the people at The Evening Phoenix for their help in publishing our little weekly. This week, a special thanks to Shirley Dobson, who came in during her vacation to typeset our copy.

• Cuts

(Continued from Page 2)

reauthorized in a year when programs are probably going to be cut in order to deal with the huge deficit," observes Polly Gault, staff director of the Senate Education Subcommittee, which will lose Sen. Jennings Randolph (D-Va) to retirement.

"Reauthorization will be a bit more difficult than in 1980," the last time Congress set long-term education goals, Gault adds.

It will be more difficult, too, because of the relative inexperience of the people replacing Perkins and Simon in the House.

The most experienced contender to replace Simon is Rep. William Ford (D-Mi), who once chaired the Post Secondary Education Subcommittee but who faces opposition from Rep. Ike Andrews (D-NC) in his effort to regain the post.

Ford shepherded the 1980 reauthorization act through the House, but gave up his education position to become head of the Post Office and Civil Service Subcommittee in 1981.

Ford may want the education subcommittee chairmanship back to get in line for a bigger position. "He wants to chair (the whole) Education-Labor (committee)," says Kathy Ozer, lobbyist for the U.S. Student Association (USSA).

House rules, however, prohibit members from holding two subcommittee chairmanships at the same time.

Ford is optimistic he'll be exempted from the rule, says Tom Wolamin, Ford's staff aide.

But Alan From, staff director of the Democratic Caucus, notes "Ford isn't the only person who would like to have the rules changed for his own benefit. There are probably younger members who would like to get a chance to run a subcommittee."

Wolamin says Ford is willing to give up his chairmanship of another subcommittee to get postsecondary education post.

"I would be very surprised if they allow him to take the subcommittee over because I think it would anger some of the younger members who don't have a chairmanship of anything," says Rose Dinapoli, a Republican legislative associate on the subcommittee. "It's a very powerful subcommittee."

Canada's Bear of Beers is here!

Down from the North Woods of Canada comes Grizzly Beer. Not just another Canadian beer, but a rare breed of brew. An authentic Canadian lager—naturally aged, so it's remarkably smooth. With a flavor no other Canadian beer can stand up to. The bear of beers is here!
